

Cashless Payment Solution for Donations

Open your donation box to cashless payments

Enabling more payment methods increases charitable giving

Don't rely on donors carrying cash. As the world transitions to a cashless society, ensure your establishment can still easily receive donations.

Donor Satisfaction

Enabling cashless donation payments provides a more convenient method of giving, leading to more contented donors.

More payment methods

Nayax enables different payment choices, including credit cards, debit cards, EMV chip cards, NFC payments, mobile apps and QR codes.

Encourage greater giving

Research indicates that people spend more when paying with credit cards

Easy integration, easy to install

Nayax's card readers can be retrofitted and integrated easily with any existing solution. Our card readers work alongside cash payments, complementing existing coin mechanisms.

Preset amounts

You can set up to 6 different donation amounts at one time, to ensure that donors are comfortable giving what they can, without being limited to cash in their wallets.

Private and discrete giving

Donating via Nayax's solution lets givers maintain anonymity, as card details are not saved on our servers.

Reduce theft and vandalism

Implementing Nayax's solution will reduce the threat of theft and vandalism as there is no cash box to break or money to steal.

Save time

With cashless payments, there are fewer cash transactions to collect and count. With telemetry you know exactly how much money has been received.

E-Receipts

Patrons can receive branded e-receipts, delivered to their phones, for accounting purposes.

Real-time response to events

Nayax's customizable alert system allows you to be informed of errors as they happen. With alerts, any problems can be dealt with immediately, preventing loss, machine damage and missed giving opportunities.

Monitor operations from afar

With our remote management software, monitor machine activity wherever you are. Log in from your laptop or use MoMa, Nayax's mobile app for on-the-go management.

Multiple Languages and voice interaction

Provide engagement with donor that they will understand

Mobile App

Monyx Wallet lets consumer give directly from their phones

Remote Management

Track machine operation remotely

Cashless transaction monitor

See at a glance the number of donations received

Provide donors with the opportunity to give more using cashless payments!
